Distributore Autorizzato

**We are the respiratory protection specialists,
dedicated to protecting people for life's best moments.**

Protecting people drives everything we do at GVS-RPB®. For over four decades, we have serviced the industrial market, working with world leading engineers, constantly pushing creative boundaries with new technology that advances our functional capabilities, seeking input from our end users, and refining our range to create the world's best respirators.

As our passion for protecting people continues to grow, we have extended our product range and branched into new industries, sharing our respiratory protection expertise to better the lives of more people. Through this growth, we have taken the next step in our journey, becoming part of the GVS Group, a global manufacturer of filtration devices for the Medical & Life Science, Energy & Mobility, and Health & Safety industries. By teaming up with dedicated filtration specialists, this enables us to expand the possibilities of what personal protection has to offer as we continue to shape the future of respiratory protection.

GVS | **rpb**

Protecting you for life's best moments.

Our powered air range enables you to move freely around your application while receiving the highest level of respiratory protection when working in hazardous environments. Through positive pressure breathing, our PAPRs support your breathing, helping to reduce the effects of fatigue, so you can perform at your best, for longer.

The PX5® is a portable, battery powered air purifying respirator (PAPR) which draws in contaminated air from the user's immediate vicinity, passing it through internal filters, and supplying the filtered air to an approved loose-fitting respirator headtop.

Our supplied air range gives you the confidence that the air you breathe is safe, detecting toxic gases, removing moisture, odor and particulates and controlling the temperature of your supplied air to enhance your safety.

The flow control range allows the operator to control the flow rate, and temperature of their supplied breathing air when paired with their required SAR headtop.

These devices fit around the user's waist (belt included) and connect the supplied breathing airline to the appropriate SAR respirator (sold separately).

⚠ WARNING PRODUCT SELECTION

- 1. Determine what type of protection is required for your activity.** As applicable, check your workplace safety program, respiratory protection program, and standards and regulations for your activity or industry.
 - 2. Check product specifications.** Contact GVS-RPB® or check the product instruction manual (downloadable from gvs-rpb.com) for complete specifications, including approvals, standards, and regulations to which the product conforms.
 - 3. Make sure you have a complete system.** Verify that you have or are purchasing all required components. System requirements are available from GVS-RPB® or in product instruction manuals.
- Selecting inappropriate or incomplete equipment, including the use of counterfeit or non-GVS-RPB® parts, can result in inadequate protection and will void the NIOSH approval of the entire respirator.**
